

Midlothian Integration Joint Board

Thursday 5th October 2017, at 2.00pm

Measuring Performance Under Integration

Item number: 5.2

Executive summary

To update the IJB on progress towards achieving the Local Improvement Goals that the IJB agreed in April 2017.

Board members are asked to:

- Comment on performance across the improvement goals.
- Note that the IJB will receive a more frequent update on progress than previously agreed and a report will be received every month.

Measuring Performance Under Integration

1. Purpose

- 1.1. To update the IJB on progress towards achieving the Local Improvement Goals that the IJB agreed in April 2017.

2. Recommendations

- 2.1 Comment on performance across the improvement goals.
- 2.2 Note that the IJB will receive a more frequent update on progress than previously agreed and a report will be received every month.

3. Background and main report

- 3.1 The IJB agreed to use the following local improvement goals to measure improvement across the health and care system. These goals are based on indicators that the Ministerial Strategic Group for Health and Community Care agreed in December 2016.

Midlothian IJB Local Improvement Goals
1: Reduce unscheduled admissions by 5% by September 2018
2: Reduce unscheduled hospital occupied bed days by 10% by April 2019
3: Reduce the number of patients arriving by ambulance to A&E who are subsequently discharged home
4: By April 2018 over 87% of patients who are subsequently admitted into hospital from A&E are within the 4 hour standard
5: Maintain the current number of patients using A&E (ongoing)
6: Reduce delayed discharge occupied bed days by 30% by April 2018
7: No patients in the RIE or WGH with a delayed discharge over 72 hours by April 2018
8: Reduce by 10% by April 2018 the number of occupied bed days in the RIE and WGH during the last six months of life*
9: Reduce the percentage of patients over 75 who are in a larger hospital from 1.9% to 1.6% and in an care home from 6.8% by TBD*

*further work required to finalise the goal target or date.

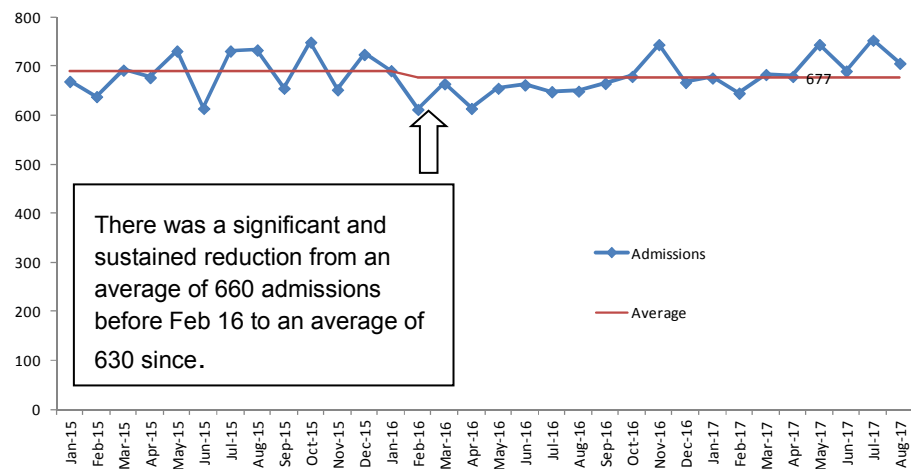

- 3.2 The IJB agreed in April 2017 to receive a quarterly update on progress towards the Midlothian IJB Local Improvement Goals. It is recommended that this frequency of the reporting is increased so that IJB members receive reports at each IJB meeting.
- 3.3 Appendix One provides technical detail of how these goals are measured and how the baselines were calculated.

1: Reduce Unscheduled Admissions by 5% by September 2018

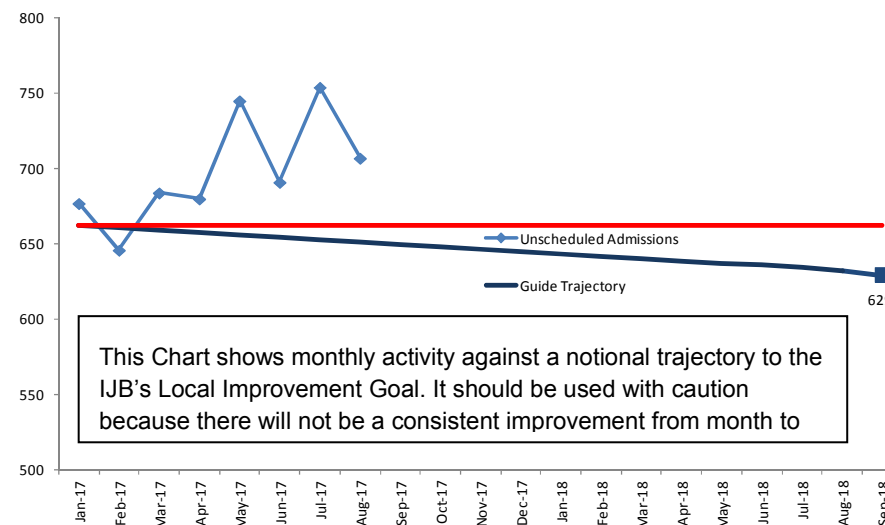

Baseline: 662 admissions per month*

* This was incorrectly reported previously to the IJB as 640

1a: Number of Unscheduled Admissions from Midlothian

1b: Unscheduled Admissions from Midlothian: Guide trajectory & baseline

1c: Unscheduled Admissions from Midlothian - comparison with performance in previous years

The baseline of 662 uncheduled admissions from Midlothian per month was calculated from performance in 2015 and 2016

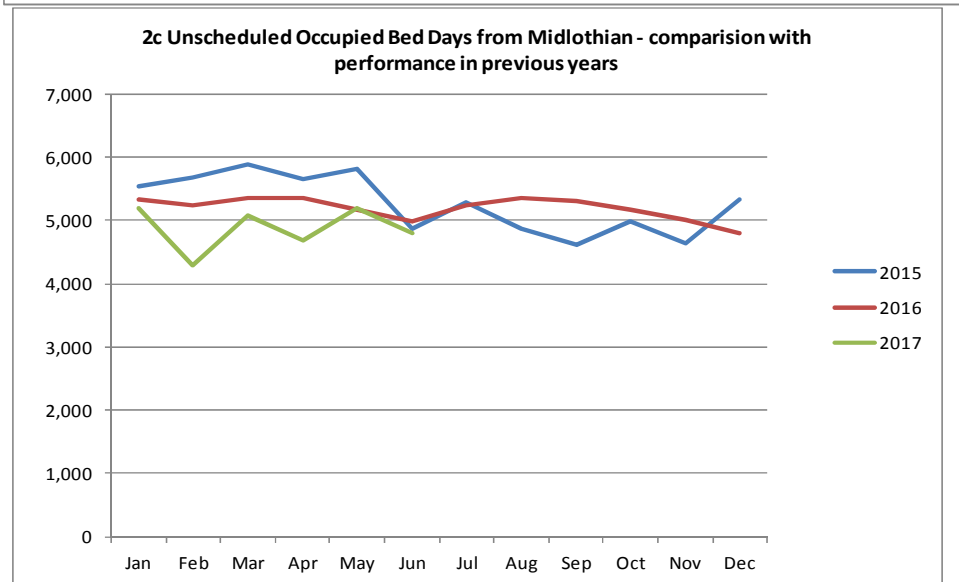

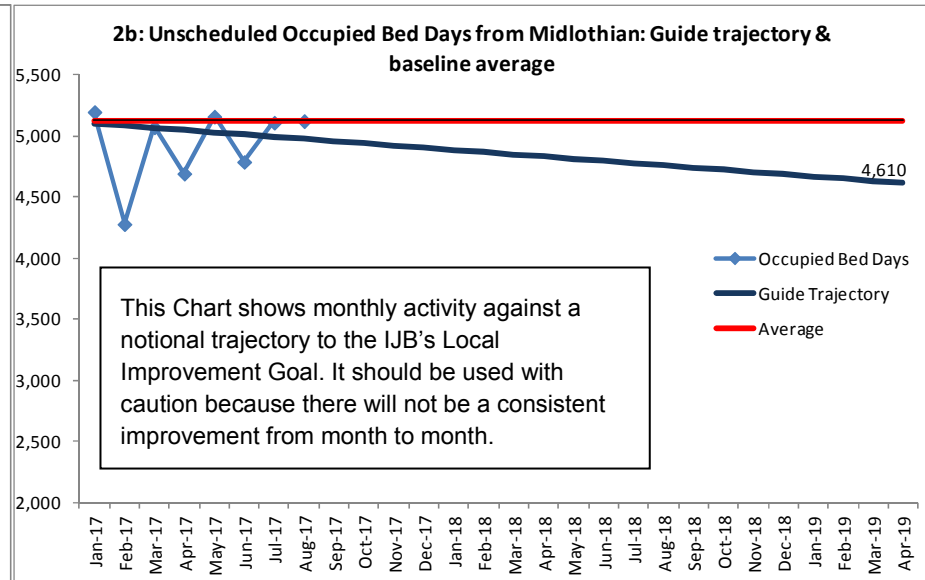

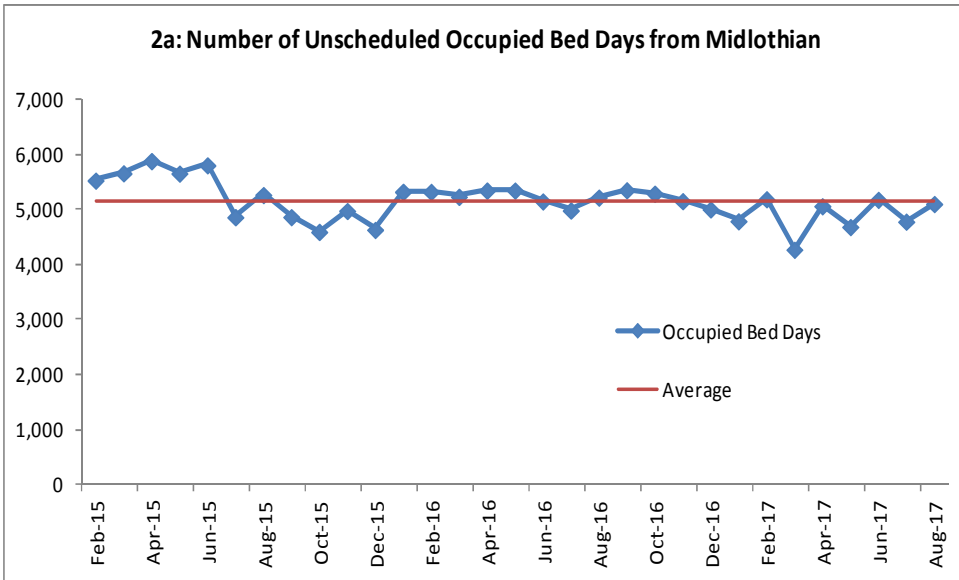

Chart 1c shows that performance in 2017 is tracking closely with performance in 2015.

Direction for improvement

2. Reduce uncheduled hospital occupied bed days (OBD) by 10% by April 2019

Baseline: 5,122 OBD per month

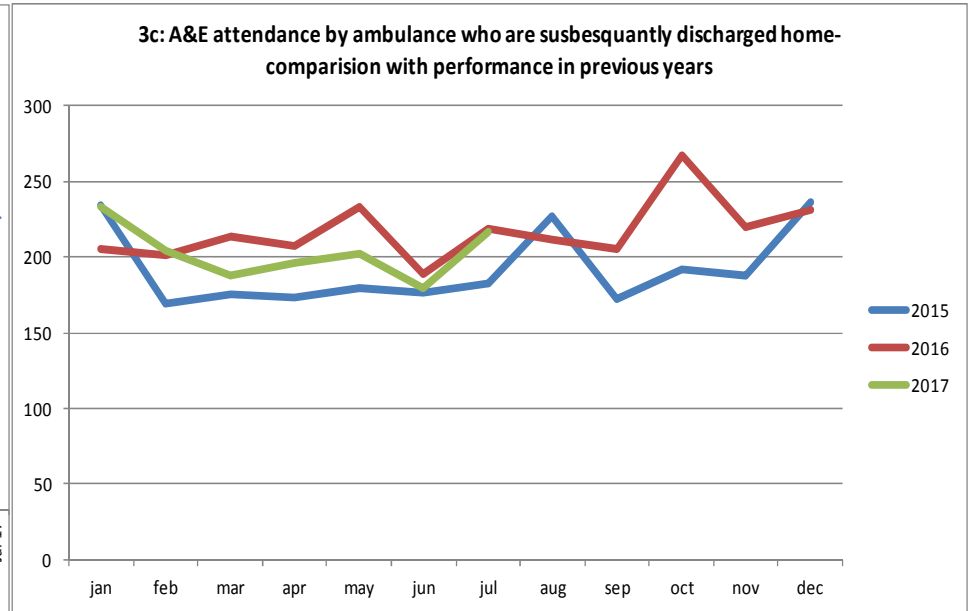

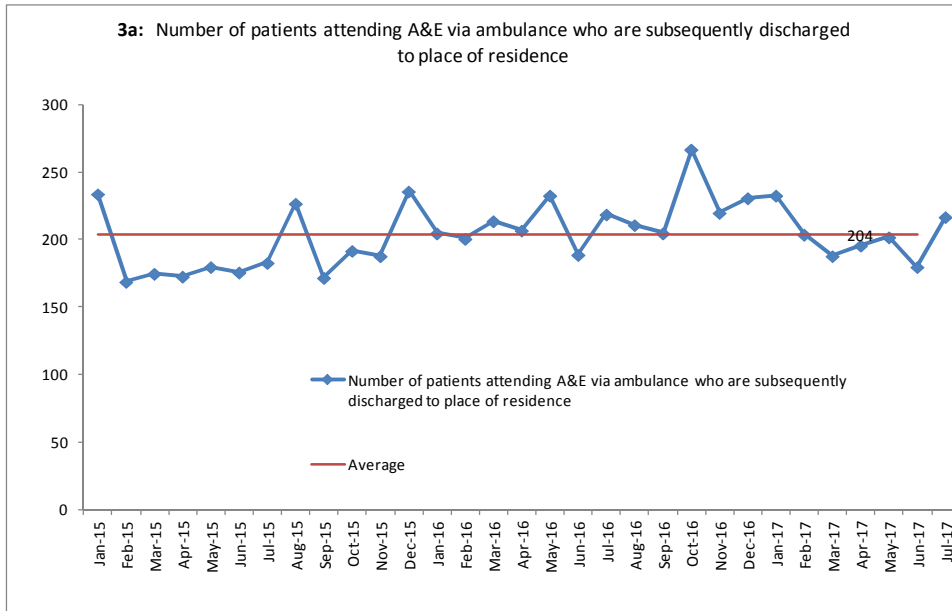

The baseline of 5,122 unscheduled OBD from Midlothian in each month was calculated from performance in 2015 and 2016

There is seasonally variation apparent in chart 2a.

Chart 2c appears to show that performance in 2017 is better than in performance with performance in 2015 and 2016. .

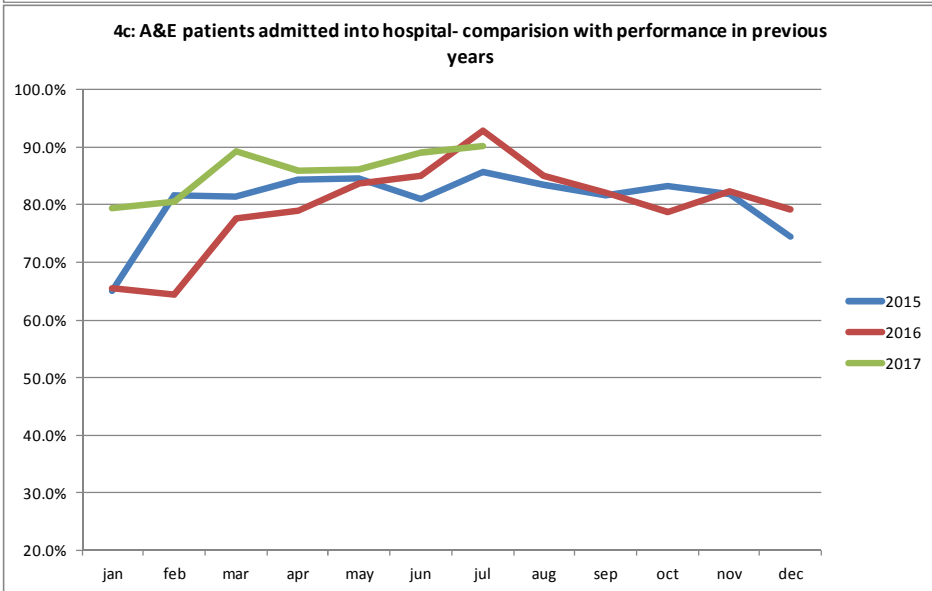

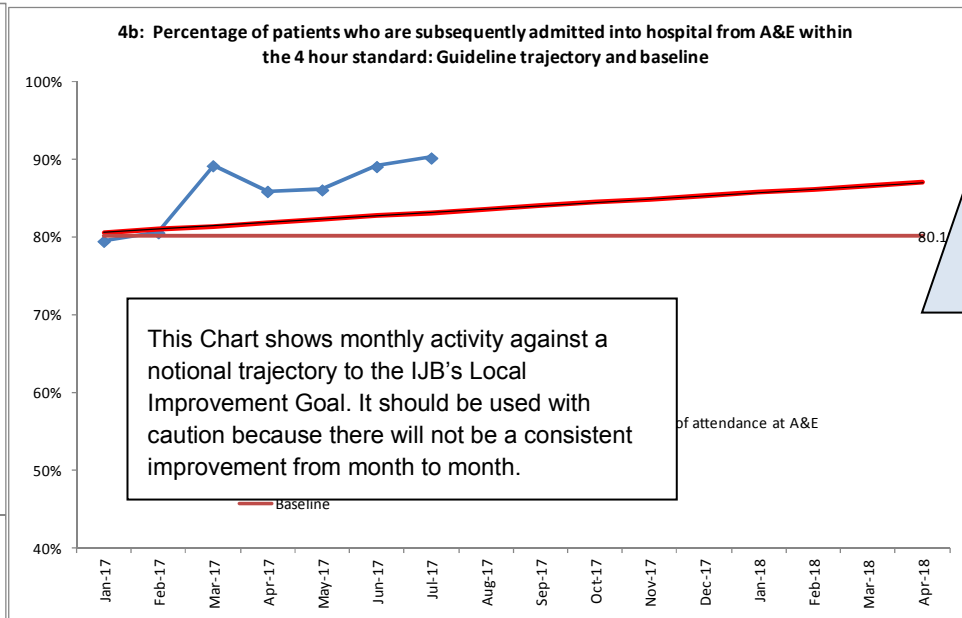

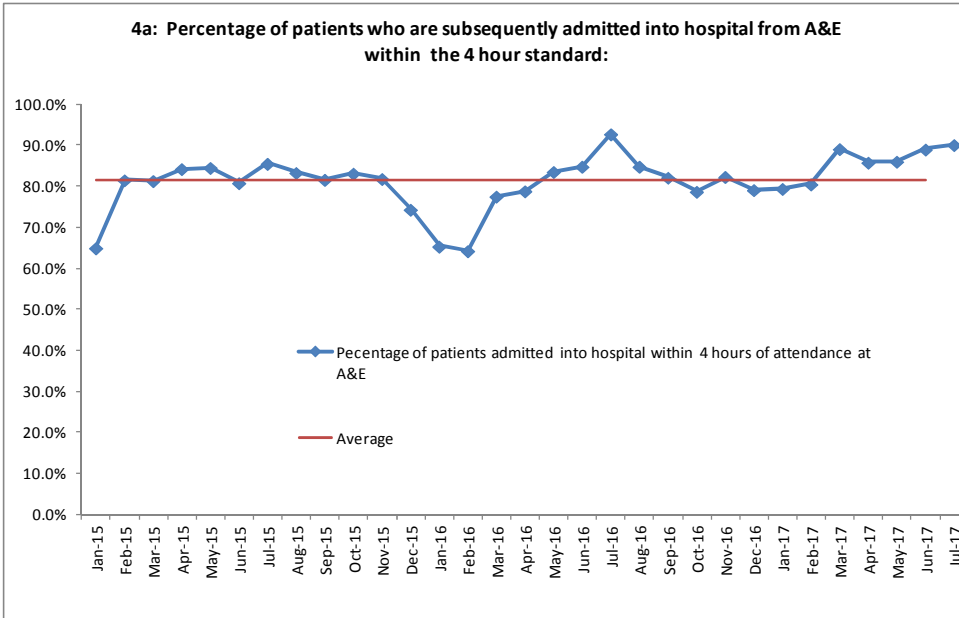

3. Reduce the number of patients arriving by ambulance to A&E who are subsequently discharged home Baseline: 206

The baseline is 206 patients per month who attended A&E via Ambulance who were subsequently discharged to their place of residence during 2015 and 2016.

Both charts demonstrate an increasing number of patients are following this pathway.

4: By April 2018 over 87% of patients who are subsequently admitted into hospital from A&E are within the 4 hour standard.

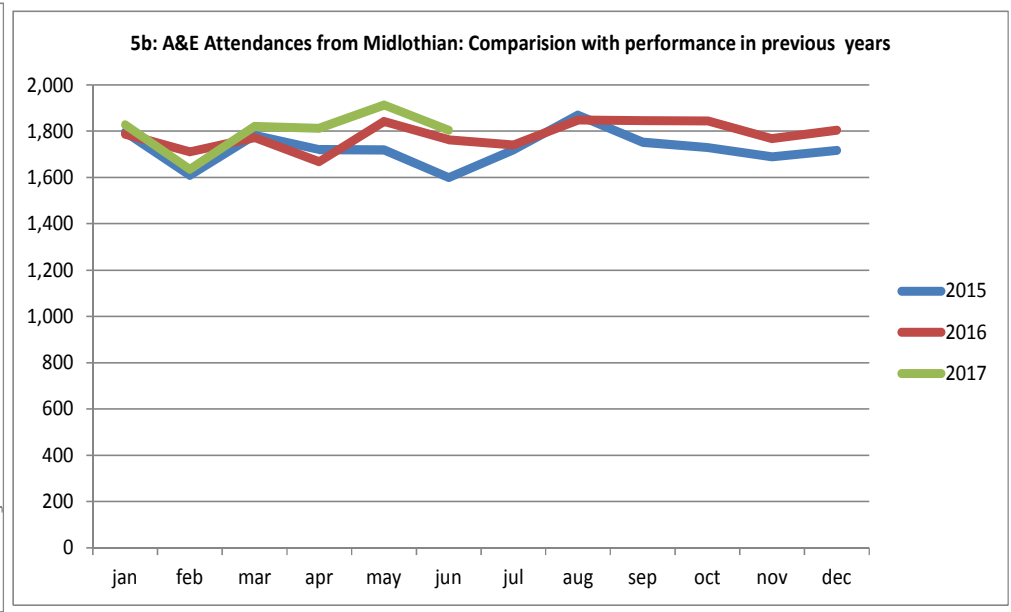

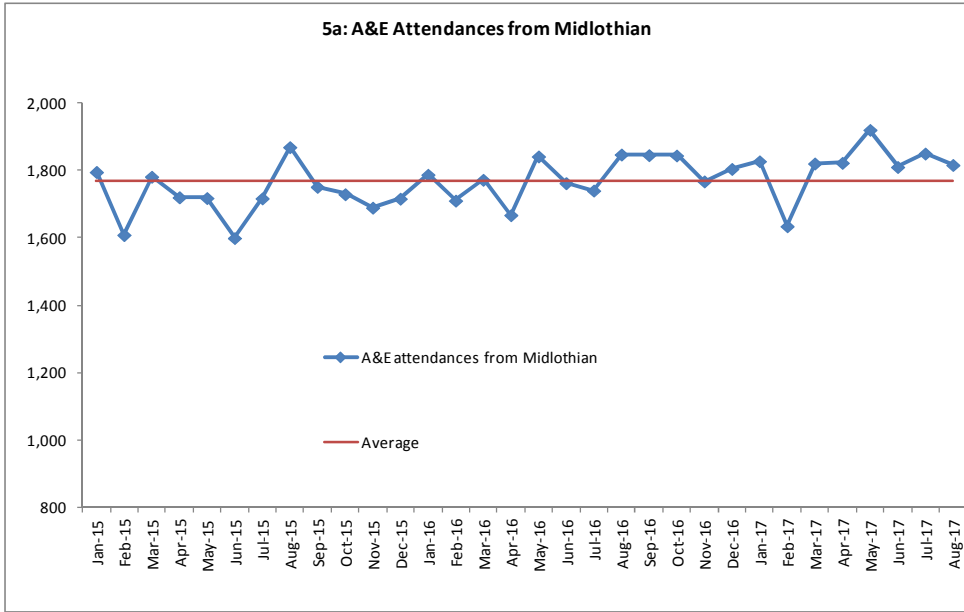

The baseline for this goal is **80.1%** each month which was the average percentage each month during 2015 and 2016 against the 4 hour A&E standard for patients who were subsequently admitted to hospital.

There is seasonally variation apparent in chart 4a.

Chart 4c shows that performance in 2017 is better than the same months in previous years

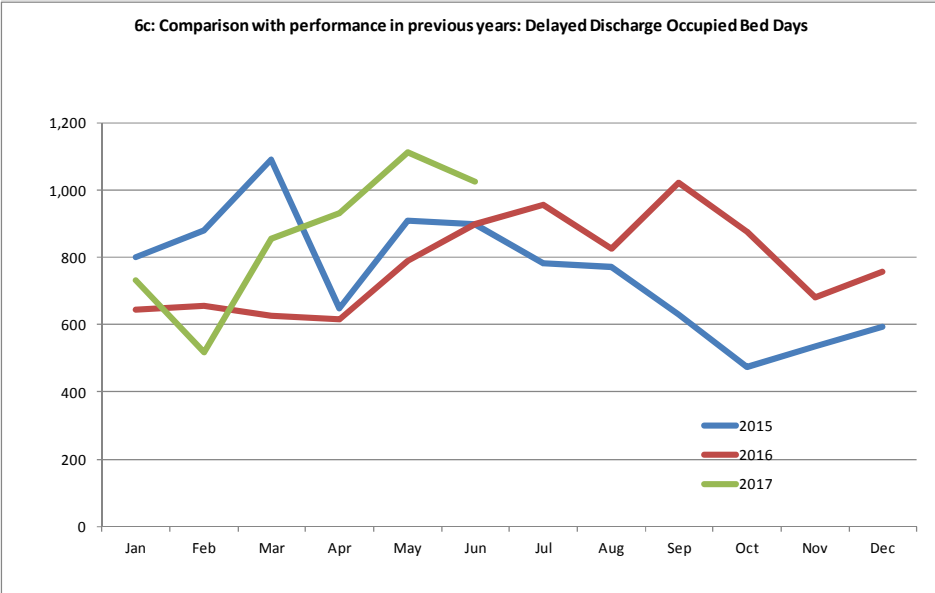

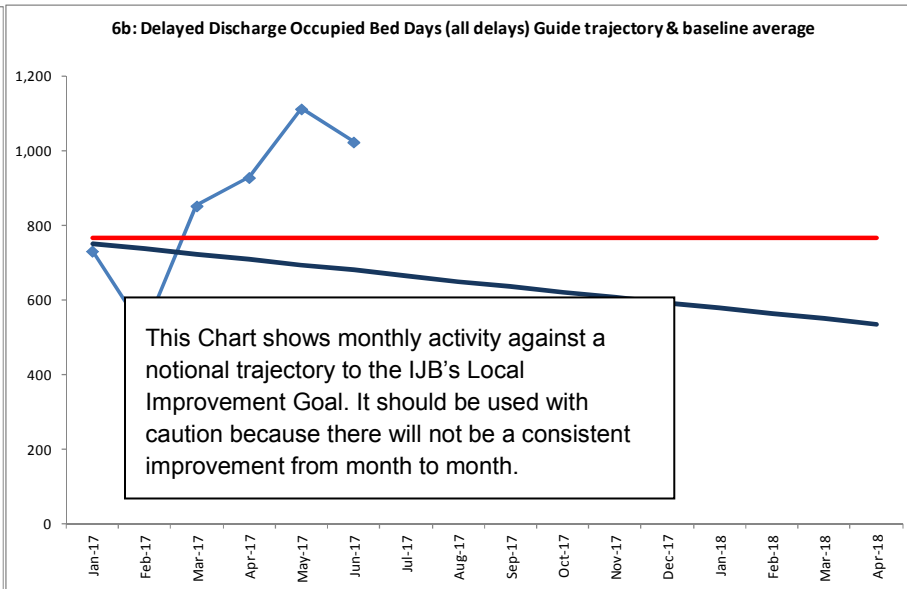

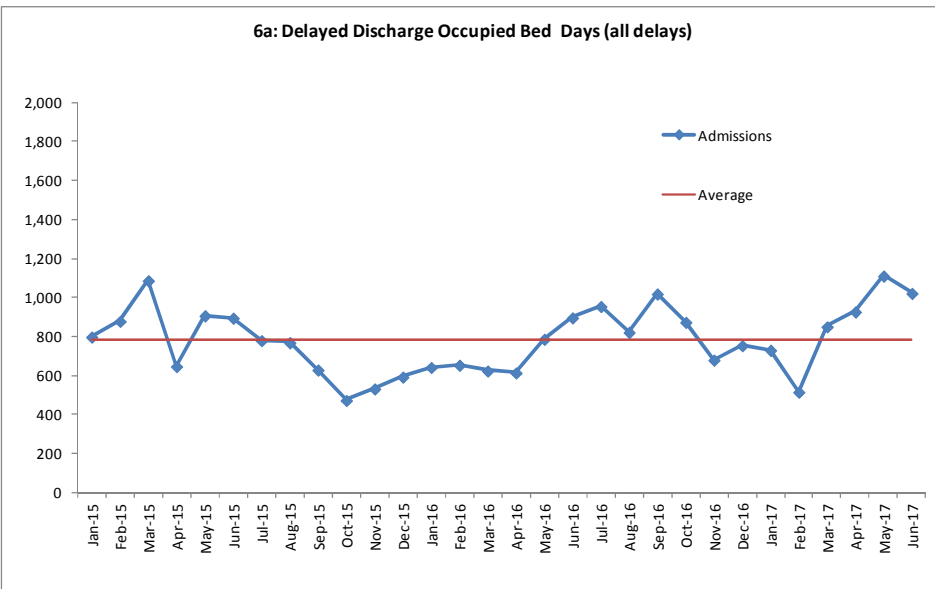

5: Maintain the current number of patients using A&E (ongoing) Baseline: 1,756 A&E attendances

The baseline for this goal is 1,756 A&E attendances which was the average number of monthly attendances in 2015 and 2016.

6: Reduce delayed discharge occupied bed days by 30% by April 2018

Baseline: 765 delayed discharge OBD

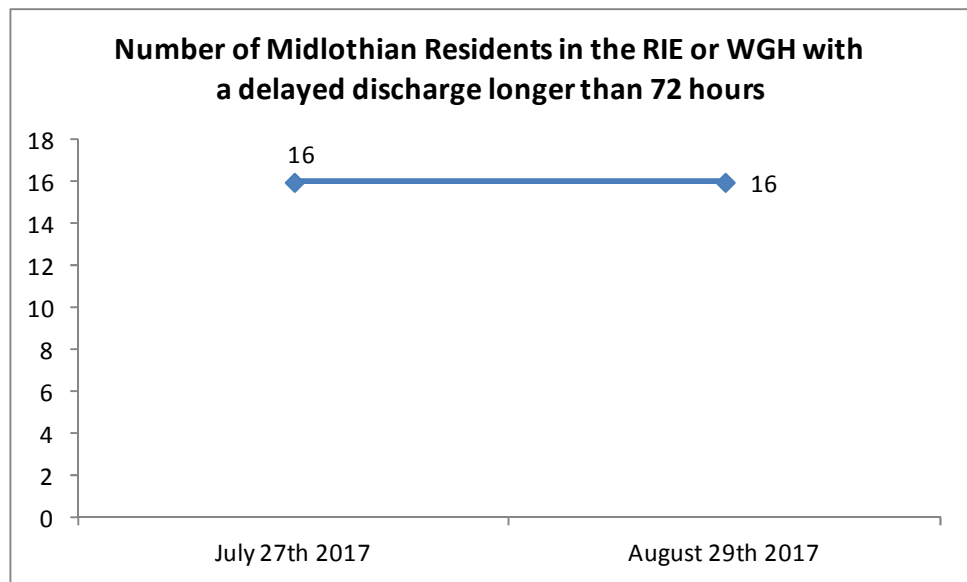

The baseline for this goal is 765 OBD per month. This was average number of occupied bed days per month in 2015 and 2016 as a result of a delayed discharge.

7: No patients in the RIE or WGH with a delayed discharge over 72 hours by April 2018

The information for this Improvement Goal is captured on the Delayed Discharge census date (last Thursday of the month).

8: Reduce by 10% by April 2018 the number of occupied bed days in the RIE and WGH during the last six months of life.

	2013/14	2014/15	2015/16
Midlothian IJB*	19,162	19,991	20,132

** this includes Midlothian Community Hospital because the information source does not allow specific hospitals to be excluded*

The information available does not currently allow separation of time spent in Midlothian Community Hospital from time spent in the Edinburgh Royal Infirmary or Western General Hospital. Further work is required to separate the data for these hospitals.

9: Reduce the percentage of patients over 75 who are in a larger hospital from 1.9% to 1.6% and in an care home from 6.8% to 6.2% by TBD

	2013/14	2014/15	2015/16
Midlothian IJB	2.0%	2.1%	1.9%

Further work is required to confirm a timeframe for this goal.

4. Policy Implications

- 4.1 The performance improvement goals will support the implementation of the IJB Strategic Plan.

5. Equalities Implications

- 5.1 There are no equality implications from focussing on these goals but there may be implications in the actions that result from work to achieve them.
- 5.2 The focus of most of the goals is on reducing hospital activity and hospitals are not used equally by the population. There are population groups that make more use of hospitals than other groups – for example older people or people living in areas of deprivation.
- 5.2 There has not been an EQIA undertaken for the establishment. Specific actions resulting from work to achieve this goals will have an EQIA completed as part of the establishment and evaluation of the action.

6. Resource Implications

- 6.1 There are no immediate resource implications as a result of the recommendations in this paper

7 Risks

- 7.1 The main risk is that the IJB fails to set a suitable ambitious pace of change across the health and care system to reduce hospital utilisation and respond to the changing demographics

8 Involving People

- 8.1 The Strategic Planning Group has been consulted in agreeing the Local Improvement Goals.

9 Background Papers

- 9.1 None

Appendix 1:

Midlothian IJB Local Improvement Goals	Technical information on data used to monitor the goal
1: Reduce unscheduled admissions by 5% by September 2018	<ul style="list-style-type: none"> • Data Source: TRAK (Oracle Analytical Database), NHS Lothian • Ages Included: 20+ • Hospitals Included: RIE, WGH, STJ, REAS, Liberton, Princess Alexander Eye Pavilion • TRAK Admissions • IJB area of residence: Midlothian • Admission Type: Unplanned
2: Reduce unscheduled hospital occupied bed days by 10% by April 2019	<ul style="list-style-type: none"> • Data Source: TRAK (Oracle Analytical Database), NHS Lothian • Ages Included: 20+ (report does not allow 18+ to be selected) • Hospitals Included: RIE, WGH, STJ, REAS, Princess Alexander Eye Pavilion, Liberton • IJB area of residence: Midlothian • Admission Type: Unplanned
3: Reduce the number of patients arriving by ambulance to A&E who are subsequently discharged home*	<ul style="list-style-type: none"> • Data Source: NSS Discovery Level 2 A&E Waiting Target Residence • Ages Included: 20+ (report does not allow 18+ to be selected) • IJB area of residence: Midlothian • Arrival Mode: 'Ambulance –Road', 'Ambulance – air', 'ambulance + A&E retrieval tea,' • Discharge Destination: 'Place of Residence'
4: By April 2018 over 87% of patients who are subsequently admitted into hospital from A&E are within the 4 hour standard	<ul style="list-style-type: none"> • Data Source: NSS Discovery Level 2 A&E Waiting Target Residence • Ages Included: 20+ (report does not allow 18+ to be selected) • IJB area of residence: Midlothian • Discharge Destination: 'Admitted'
5: Maintain the current number of patients using A&E (ongoing)	<ul style="list-style-type: none"> • Data Source: TRAK (Oracle Analytical Database), NHS Lothian • Ages Included: All • A&E/MIU included: RIE, WGH, STJ. The A&E in Sick Kids is excluded • IJB area of residence: Midlothian
6: Reduce delayed discharge occupied bed days by 30% by April 2018	<ul style="list-style-type: none"> • Monthly data release by SOURCE team for Measuring Performance Under Integration • 'All' Delayed Discharges included
7: No patients in the RIE or WGH with a delayed discharge over 72 hours by April 2018	<ul style="list-style-type: none"> • Data Source: TRAK, NHS Lothian • TRAK and Admissions Report on monthly census day (last Thursday of the month) • All delayed discharges included which are longer on census day than 72 hours

8:Reduce by 10% by April 2018 the number of occupied bed days in the RIE and WGH during the last six months of life	
9: Reduce the percentage of patients over 75 who are in a larger hospital from 1.9% to 1.6% and in an care home from 6.8% by TBD*
