Issues

Care homes

Support to Care Homes continues. In response to Scottish Government guidance issued during the pandemic, Midlothian Health & Social Care Partnership has clinical oversight across all Midlothian Care Homes, providing support and education as required on behalf of NHS Lothian Executive Director of Nursing. Care Homes continue to be supported to provide high quality care and to comply with guidance related to the pandemic including instructions around PPE and testing of staff and residents.

Use of Acute Hospital beds

The use of unscheduled care facilities, including the ED, greatly reduced as a result of COVID-19. Services to support people who have a long term condition to stay well at home continued to operate in order to support as many people as possible to avoid hospital visits.

Many services operated whilst reducing face to face contact – telephone and digital tools were employed. It is the intention of the IJB to review the different models of service provision employed during the pandemic with a view to maintaining certain practices longer term.

Increased investment in services to reduce hospital admission and stay.

There was additional investment in services to support people who have a long term condition to stay well - for example Musculoskeletal Advanced Practice Physiotherapists (MSK APP) were trained to support people with COPD and were temporarily redeployed to the Community Respiratory Team.

Risk

COVID-19

The Health and Social Care Partnership management team is developing and reviewing plans for a potential resurgence of COVID-19 pandemic within Community which could result in increased demand for a service and risks around staff absence.

The formal budget offer to the IJB for 2020/21 provided by both partners, they were formally accepted by the IJB by March 2020. These budgets are indicative values and highlight the risk and financial challenges faced by the IJB.
