

Adult, Social Care – Q3 Performance Report 2016/17

Progress in delivery of strategic outcomes

Integration: Consultation on the 2017-18 Directions document has been issued to NHS Lothian and Midlothian Council. Work on refreshing the Strategic Plan is underway. A Workforce Plan and a Financial Strategy are being developed and a Risk Register has been completed. The IJB (Integrated Joint Board) continues to meet formally and through Development Sessions as does the Strategic Planning Group and Audit and Risk Committee.

Older People: Older Peoples Strategy now launched, and there has been continued development with many services. Highbank day care has now increased its numbers from 60 up to 80 and have been inspected by the Care inspectorate with grades increasing to 4's. Highbank care home has also been inspected and maintained their grades of 5s. Woodburn day care club new service the "Grassy Riggs" will have its open day in February. A community cafe within the MARC (Midlothian Advice and Resources Centre) building in Woodburn for older people. MERRIT (Midlothian Enhanced Rapid Response Service) has increased its capacity with hospital at home to enable more people to be looked after at home, avoiding unnecessary hospital admissions. Care at home capacity continues to be challenging however a review of care at home is underway to examine more outcome focussed care at home services for older people in Midlothian. The Joint Dementia Team has begun a duty service within the team responding to emergencies for people with dementia and their families. This should reduce waiting times for an emergency response. Newbyres is developing its short term dementia beds working closely with the Joint Dementia Team. The re-provisioning of Midlothian patients in Liberton Hospital is well underway with beds in the community hospital becoming accessible to manage these patients.

Carers: Development of the Midlothian Carers Strategy is progressing and the next stage is pulling discussions and consultations together to present to carer groups for comment. Subgroups will be developed to take forward themes, e.g. Emergency Planning, and Employment. The strategy proposes to support Adult and Young Carers and as such links are being developed with Education and Children's Services to discuss the content of the strategy, and identify work needed and ways forward to support the implementation of the Carers (Scotland) Act 2016 (commencement date identified as 1st April 2018). The Scottish Government have indicated a proposed date of December 2017 for the publication of guidance and regulations to support the new Act. Paper prepared for Corporate Management Team regarding the update on carer legislation and implementation, to be presented during Q4.

Learning Disability: Work continues on the 12 person Complex Care service, the build remains on target and a care provider has now been appointed. A review of Day Service provision is progressing and a project plan is in place, this includes the development of neighbourhood networks to increase the opportunity for people to develop skills, interests and relationships in their local community.

Physical Disability and Sensory Impairment: A programme of Awareness Raising continues to be delivered to health and social care staff. 14 volunteers have been recruited to provide a hearing aid repair service in local libraries. Audiology has given a clear commitment to provide local clinics for adults in the Community Hospital early in the New Year. Scottish Govt published "A Fairer Scotland for Disabled People" in late December and we will need to consider implications for local services.

Long Term Conditions: MERRIT (Midlothian Enhanced Rapid Response Service) has recently recruited an Advanced Practitioner Physiotherapist (APP), to take up post during Q3, who will be instrumental in developing a Community Respiratory Service to support people living with Chronic Obstructive Pulmonary Disease across Midlothian. The APP will work closely with MERRIT Hospital at Home and the Royal Infirmary Respiratory Multi Disciplinary Team, to support self management and reduce hospital admissions for this patient group.

Self Directed Support: Work is continuing to embed Self Directed Support into a 'business as usual' activity. Currently the focus of work is in two areas: (1) Reviewing back office finance processes to ensure these are not a barrier to greater flexibility in support provision and are able to increase bespoke support arrangements. (2) Reviewing support planning with providers to ensure support is being focussed on meeting outcomes and where appropriate choice and control is embedded within service provision.

Substance Misuse: In December 2016, the MELDAP (Midlothian and East Lothian Drugs and Alcohol Partnership) identified and agreed in principle a programme of savings to be made from some of its commissioned services for financial year 2017/18. This is in response to the implications of the 23% reduction in drugs and alcohol funding through the Scottish Government for 2016-17. Work is ongoing to develop a Recovery Hub in Dalkeith. This has the potential to deliver a number of key requirements of the change process including some of the required savings.

Mental Health: Mental Health Access Points were launched in two locations in Midlothian in August and already the service is well used. Staff at the Access Points guide people to access the support they need to increase their mental wellbeing; reducing low mood and feelings of stress; increasing confidence; and self-esteem. Staff help people to decide what support will work best for them, this includes psychological therapies. Around half of those who have attended have been offered assessment for psychological therapies. The House of Care Wellbeing project based at Newbattle Health centre was initially aimed at people with Long Term Conditions however many of those attending the service are presenting with Mental Health issues and are receiving support with this. The Community Health Inequalities Team continues to offer physical health checks to people with mental health issues in several locations throughout Midlothian.

Criminal Justice: A review is currently taking place of the Unpaid Work service. New job descriptions have been agreed for Unpaid Work supervisors. The intention is to establish an Unpaid Work culture that promotes a learning environment for service users. In the revised service, Unpaid Work supervisors will deliver training courses to improve clients' vocational skills. The aim will be to increase opportunities and encourage desistance from further offending. This work has already started with all individuals on Unpaid Work attending first aid training delivered by one of the supervisors. In addition Unpaid Work projects are now being targeted to areas and groups particularly affected by offending. This includes prioritising projects in areas such as Woodburn and also carrying out work to support the victims of domestic abuse.

Emerging Challenges and Risks

Funding Pressures: There is a continuing requirement to seek major efficiencies despite the growing demand, particularly in relation to older people and those with complex needs. The service was overspent primarily as a result of some very high care packages and work is being undertaken to find more cost effective ways of providing care. The move towards an integrated budget through the establishment of the Integration Joint Board provides an opportunity to make better use of collective resources. Specific funding pressures include a potential shortfall between Carers Information Strategy monies, which is due to end, and the provision of funding provided for the implementation of the Carers (Scotland) Act 2016.

Capacity and Quality of Services; The ongoing shortfall in care at home capacity has been difficult to manage and has had a knock-on impact on the Reablement Service as the limited capacity of external providers has impacted the ability to move people following their period of reablement. The longer term viability of services in both care homes and care at home services requires a long term approach to workforce planning and the promotion of social care as a career, and this work is being undertaken on a multi-agency basis involving NHS Lothian and the Third Sector. A specific development has been the establishment of a Health and Care Academy. The decision to fund the Living Wage in the care sector also provides an opportunity to create a more sustainable and stable workforce. Currently managing large scale investigations for one care home and one care at home provider.
