

Draft Date - 31 January 2017

**Pupil Equity Funding – National Operational Guidance****What is it?**

The Pupil Equity Funding is additional funding allocated directly to schools and targeted at closing the poverty related attainment gap. The Scottish Government has committed to this funding as part of the Scottish Attainment Challenge programme from 2017-18. The Pupil Equity Funding forms part of the £750m Attainment Scotland Fund.

This national guidance is intended to help schools plan how they will most effectively invest their Pupil Equity Funding allocation to improve the educational outcomes of children affected by poverty. Local authorities will issue complementary guidance about how the funding will operate locally.

**Key Principles**

- Headteachers must have access to the full amount of the allocated Pupil Equity Funding.
- The Pupil Equity Funding must enable schools to deliver activities, interventions or resources which are clearly additional to those which were already planned.
- Headteachers should work in partnership with each other, and their local authority, to agree the use of the funding. Schools must take account of the statutory responsibilities of the authority to deliver educational improvement, secure best value, and the authority's role as employer. Local Guidance will set out more detail on how this will operate.
- The operation of the Pupil Equity Funding should articulate as closely to existing planning and reporting procedures as possible – e.g. through School Improvement Planning and Standards and Qualities reports.
- Parents and carers, children and young people and other key stakeholders should be involved in the planning process.
- Funding must provide targeted support for children and young people affected by poverty to achieve their full potential. Although the Pupil Equity Funding is allocated on the basis of free school meal eligibility, Headteachers can use their professional judgement to bring additional children in to the targeted interventions.
- Headteachers must base their use of the funding on a clear contextual analysis which identifies the poverty related attainment gap in their schools and plans must be grounded in evidence of what is known to be effective at raising attainment for children affected by poverty.
- Schools must have plans in place at the outset to evaluate the impact of the funding.

**How much is it?**

Publicly funded primary, secondary and special schools will receive £1,200 in 2017-18 for each child in Primary 1 to S3, or equivalent, who is eligible and registered for free school meals.

**How is it allocated?**

Pupil Equity Funding will be allocated to schools on the basis of the estimated number of children and young people in P1-S3 registered for free school meals under the national eligibility criteria<sup>1</sup>.

In 2017/18 the funding allocation will be calculated using the most recently available Healthy Living Survey and Pupil Census data and will be based on:

- The estimated number of P1-P3 pupils who would be registered for free school meals using the national eligibility criteria. This will be done by taking the figures for 2014/15 and then applying those to the 2016 school rolls for P1 to P3.
- The estimated number of P4-P7 and S1-3 pupils who are registered for free school meals.
- The estimated number of special school pupils in the P1-S3 age range registered for free school meals.

The approach to estimating free school meal registrations will be kept under review as the Government seeks to improve the quality of data for identifying children living in households affected by poverty.

Funding for 2017/18 will be paid by the Government to local authorities by means of ring-fenced grant which will clearly indicate the amounts that should be allocated directly to each school. Local authorities will confirm arrangements for draw down at school level.

### **How can it be used?**

The funding should be focused on activities and interventions that will lead to improvements in literacy, numeracy and health and wellbeing.

Although the funding is allocated to schools on the basis of free school meal eligibility, Headteachers have the discretion to make decisions about which children and young people would benefit most from any particular intervention, whilst keeping a clear focus on delivering equity. Family learning opportunities can also be considered as potential interventions, as can interventions that impact on transitions between school stages.

A framework, '[Interventions for Equity](https://education.gov.scot/improvement/Pages/Interventions-for-Equity-framework.aspx)'<sup>2</sup> has been developed to support the planning and implementing of interventions to meet the needs of children and young people affected by poverty in order to close the attainment gap. The examples cited act as a stimulus for wider reflection of what would suit your local context and are by no means the only interventions that should be considered.

Headteachers can work at an individual school and local community level or collegiately in wider school clusters and beyond at local authority level to address common interests. Interventions should be considered within the context of the school planning cycle and must be targeted towards closing the poverty related attainment gap. Where appropriate, funding should articulate with existing Scottish Attainment Challenge School and Challenge Authority improvement plans.

Evidence shows that some children and young people from equalities groups are disproportionately affected by deprivation and can therefore face significant additional barriers to learning. Education authorities have responsibilities to actively address inequality. In this context, headteachers should promote equity by taking into account equality groups

<sup>2</sup> <https://education.gov.scot/improvement/Pages/Interventions-for-Equity-framework.aspx>

when planning support and interventions. Funding should not be used in ways that stigmatises children and young people or their parents.

### Partnerships

Parents and the local community are a valuable source of support and partnership. In many contexts schools may be able to achieve the best possible outcomes for children and young people by working with a range of bodies such as parent groups; parent councils; other local authority services; third sector organisations (including youth work, family learning organisations); other educational sectors; and/or centres of expertise. Understanding the needs of children and young people should help to identify appropriate areas for collaboration.

### Staffing

Where schools identify the need to recruit additional staff for an appropriate intervention or activity, they should work closely with the Local Authority (as the employer) to ensure that the job remits and specifications are clearly tied to the aims of the intervention. Headteachers need to take full account of local HR policies and procedures. Any teachers recruited will be excluded from the authority's contribution to any national teacher numbers and / or ratio commitment.

### Procurement

Purchase of resources, equipment or services must comply with existing local authority procurement procedures. This will be particularly important when buying ICT resources (see below) or, for example, services from third sector partners. Schools should liaise with their relevant local authority finance partners to ensure compliance with procurement policies and legislation.

### ICT

The Pupil Equity Funding can be used to procure digital technologies, including hardware and software, when its allocation and use is particularly focused on supporting children and young people affected by poverty to achieve their full potential. The Scottish Government provides access to a range of national procurement frameworks for the purchase of digital technology products and devices, including a range of desktops, laptops and tablets. The frameworks offer a direct route to market and significant savings against RRP.

To prevent issues arising with compatibility and connectivity, schools seeking to purchase digital technology should do so in close consultation with the IT Department at their local authority.

We know that simply providing more technology does not result in improved outcomes for learners. Therefore, any deployment of technology in an educational setting should be undertaken in line with the objectives of the national [Digital Learning and Teaching Strategy](#)<sup>3</sup>.

### **Support**

---

<sup>3</sup> [www.gov.scot/Publications/2016/09/9494](http://www.gov.scot/Publications/2016/09/9494)

There is a package of support available to assist schools in planning how to use their Pupil Equity Funding. This includes:

- A [framework](#)<sup>4</sup> of evidenced and proven educational interventions and strategies to help tackle the poverty related attainment gap. The framework can be used by all partners and should help to inform the decisions schools make. The structure and content will be dynamic and will continue to evolve as an integral part of the National Improvement Hub, where a wide range of improvement, self-evaluation and research materials are available and where practice exemplars can be shared. Other research summaries and intervention examples will be incorporated as these become available.
- This suite of materials will be developed further in the coming months as the Scottish Government works with the Education Endowment Foundation to develop a Scottish specific version of their Teaching and Learning toolkit.
- A series of regional events aimed at school leaders which will take place in February 2017. Scottish Government will support locally organised events where possible.
- Attainment Advisors who will be able to provide advice on a regional basis.
- A dedicated Scottish Attainment Challenge community on Glow where all educators can have online discussions, ask questions, post responses, exchange ideas, access additional resource materials and share examples of practice. In addition, this secure community will be used to host regular discussions about the interventions and strategies being developed through the Pupil Equity Funding.
- Access to collaboration and communication tools on Glow including Yammer, Sharepoint, Blogs and Glow TV. These tools provide great opportunities for joint working and for sharing materials across all involved in the Scottish Attainment Challenge, with the ability to control visibility where required.
- School Improvement Planning guidance. This will be provided through the National Improvement Framework.

Local authorities will also offer their own packages of support for schools to help them plan how to use the funding effectively.

### **Outcomes, impact and measurement**

At a school level, it is essential that teachers continue to make best use of the data they have access to locally to understand which children and young people would benefit from targeted support and to monitor and track learners' progress over time. Further guidance on the [BGE assessment model](#)<sup>5</sup> was issued in November 2016.

## **Accountability and reporting**

The Headteacher will be accountable to their local authority for the use of Pupil Equity Funding within their school. To ensure transparency, schools will be expected to incorporate details of their Pupil Equity Funding plans into existing reporting processes to their Parent Council and Forum, including in their School Improvement Plans and Standards and Quality Reports. These reports should be publicly available so that parents can understand what is happening in their school. The arrangements for publication will be confirmed by your local authority.

School inspection and other review processes will be used where necessary to ensure schools use their funding appropriately. The 'How Good Is Our School? 4' includes an evaluation on the six point scale of the school's success in raising attainment and achievement and ways in which they can demonstrate improvements to equity for all learners. In addition, the operation, use and effectiveness of the Pupil Equity Funding at closing the poverty related attainment gap at a local authority level will feed into other existing quality assurance processes, such as Audit Scotland's Shared Risk Assessment.

## **Unspent funds**

Where schools are unable to spend their full allocation during the financial year, any underspent grant may be carried forward to the next financial year though it would be expected that it would normally be spent within the school year. Schools will need to liaise closely with their local authority to agree arrangements for carrying forward Pupil Equity Funding, which should be considered separately from other funding within the devolved school management budget.
