Reasonable Assurance	There is a generally sound system of governance, risk management and control in place. Some issues, non-compliance or scope for improvement were identified which may put at risk the achievement of objectives in the area audited.
Limited Assurance	Significant gaps, weaknesses or non-compliance were identified. Improvement is required to the system of governance, risk management and control to effectively manage risks to the achievement of objectives in the area audited.

Recommendations

3.7 Recommendations in reports are suggested changes to existing procedures or processes to improve the controls or to introduce controls where none exist. The grading of each recommendation reflects the risk assessment of non-implementation, being the product of the likelihood of the risk materialising and its impact:

High	Recommendations relating to factors fundamental to the success of the control objectives of the system. The weaknesses may give rise to significant financial loss/misstatement or failure of business processes.
Medium	Recommendations which will improve the efficiency and effectiveness of the existing controls.
Low	Recommendations concerning minor issues that are not critical, but which may prevent attainment of best practice and/or operational efficiency.
Outwith the report, Internal Audit informs operational managers about other matters as part of continuous improvement.

4 Report Implications (Resource, Digital, Risk and Equalities)

4.1 Resource

Resource implications of implementing Internal Audit recommendations are considered as part of the audit process to ensure these are reasonable and proportionate to the risks.

4.2 Digital

There are no digital implications arising from this report.

4.3 Risk

The PSIAS require Internal Audit to evaluate the effectiveness of the Council's Risk Management arrangements and contribute to improvements in the process. At the start of each audit engagement, to capture potential areas of risk and uncertainty more fully, key stakeholders have been consulted and risk registers have been considered. During each audit engagement the management of risk has been tested.

It is anticipated that improvements in the management and mitigation of risks will arise as a direct result of Management implementing the Internal Audit recommendations made. If audit recommendations are not implemented, there is a greater risk of financial loss and/or reduced operational efficiency and effectiveness, and Management may not be able to demonstrate improvement in internal control and governance arrangements, and effective management of risks.

4.4 Ensuring Equalities

This report does not relate to a new or revised policy, service or budget change, which affects people (the public or staff), so an Integrated Impact Assessment (IIA) is not an applicable consideration.

The Internal Audit work is carried out in accordance with the appropriate legislation and professional standards. The latter includes compliance by those within the Internal Audit function with the Code of Ethics set out in the PSIAS which is appropriate for the profession of Internal Audit founded as it is on trust placed in its independent and objective assurance about risk management, internal control and governance.
