Midlothian 

Progress in delivery of strategic outcomes

"People in Midlothian will lead longer and healthier lives by getting the right advice, care, and support, in the right place, at the right time."

The Adult Health and Social Care service continues to undergo redesign as required by the Integration agenda. The 2016-19 Strategy and 2017-18 Delivery Plan outlines a major programme of service changes designed to promote prevention and recovery. The enablers to achieve include improved partnership working, public engagement and working with communities. The three major programmes of redesign are Learning Disability Day Services, Care at Home, and Care Packages.

1. Integration

First version of a Property Strategy has been developed for consideration by the Integrated Joint Board (IJB). The financial challenges faced by the IJB have been considered at a development session and a further iteration of the Finance Strategy is being developed. The workforce framework is now being applied to particular service areas such as the Social Work Assessment Team. In relation to joint working the delivery of the Recovery Hub will enable mental health services, substance misuse services and criminal justice services to work in a more integrated way and will strengthen the partnerships core priorities which is to develop a more effective Recovery Integrated System of Care.

2. Older People

The Joint Dementia team now has a dedicated Team Leader and an additional Post Diagnostic Support worker assisting the team in meeting the needs of those people and their families living with dementia. The Hospital at Home service has increased capacity with additional nurses aiming to keep people out of hospital where appropriate. The voluntary organisations that deliver alternatives to care at home continue to respond to increasing numbers of referrals in supporting people at home safely and improving their socialisation. Highbank Care Home continues to be very busy with supporting intermediate care and avoiding unnecessary hospital admissions. It has reduced its number of respite beds by one and increased their intermediate care facility by one in response to demand. Closer partnership work is underway between MERRIT and Acute Medical Unit as well as reviewing the pathways from acute to the Community Hospital to ensure we have the appropriate referral pathways in place.

3. Learning Disabilities

A Day Services Policy and Strategy is now progressing to an implementation phase with plans being progressed to increase the range of day services being provided within Midlothian. Teviot Court, the development of 12 houses for people with complex care needs in Penicuik, is complete and being occupied in a phased approach. Ongoing review of care packages is being progressed to ensure individuals are receiving the right level of support to meet their needs.

4. Physical Disabilities/Sensory Loss

The Joint Physical Disability Planning Group finalising the design, content and governance of the proposed newsletter. Social media continues to be used as an additional means of communicating with the disabled community in Midlothian. Work is underway to review the Physical Disability page of the Council website. The Adult Audiology Clinic at the Community Hospital has lacked uptake or further development due to staffing issues in Audiology. The proposed changes to library service provision mean uncertainty in progressing new hearing aid maintenance and repair clinics in these locations. Further talks have taken place with the Scottish Fire Service to progress simple referral pathways between our organisations. The British Sign Language National Plan was launched on 24th October, and guidance is currently being awaited to inform the creation of a Midlothian Council Plan.

5. Self Directed Support

Work continues to embed Self Directed Support into a 'business as usual' activity. Ongoing service development is focussing on ensuring back office processed support Self Directed Support. A scheme has been set up to assist individuals utilise direct payments by providing an online listing of prospective personal assistants.

6. Criminal Justice

A Peer Support Development Worker supporting Criminal Justice, Substance Misuse and Mental Health has been appointed following agreed funding. Training is taking place in January 2018 as part of the introduction of Safe and Together which provides a framework for partnering with domestic violence survivors and interviewing with domestic violence perpetrators in order to enhance the safety and wellbeing of children. The Criminal Justice team now has

the capacity to provide interventions to non-Court mandated domestic abuse perpetrators and should start to receive referrals when Safe and Together is embedded in practice.

7. Substance Misuse

Funding for the development of a Recovery Hub which will bring together mental health, substance misuse and criminal justice services, including third sector partners, has been approved by Council. The hub reflects the wishes of people with lived experience to have better co-ordinated, easily accessible services that reduce the need to repeat their stories. Peer support through peer workers, volunteers and mentors will be an integral part of the Recovery Hub. In preparation for the delivery of the Recovery Hub, MELDAP have hosted a workshop for managers to consider further service developments prior to implementation of the hub. A consultation event is planned for February 2018, to discuss how service user/carers and community groups may use the hub building in the evenings and at weekends to further the aims of recovery.

8. Mental Health

Attendance at the weekly Mental Health Access Points in Penicuik and Bonnyrigg continues to grow. Staff at the Access Points guide people to the support they need to increase their mental wellbeing; reducing low mood and feelings of stress. Over 71 Community Services and resources have been signposted/referred into and over 60% of those who have attended have gone on to be offered an assessment for psychological therapies. The Wellbeing Service in 8 GP practices is assisting many people to access self-help resources and quicker access to psychological therapies. Evaluation of the service is demonstrating good evidence about the positive impact of the service. The Triage project introduced with Police to ensure that people in crisis get quick access to the right type of support is resulting in substantial savings in Police time.

9. Carers

The Midlothian Carers Strategy and Action Plan 2017/19 has been completed and presented to Council and the Integrated Joint Board for approval. Work towards the implementation of the new Carers (Scotland) Act 2016 in April 2018 progressing well, and the Carers Strategic Planning Group will change to become the Carers Act Implementation Planning Group. This group will oversee the Strategic Action Plan, but also undertake work and be a reporting mechanism for other subgroup working on implementation.

Emerging Challenges and Risks

Funding Pressures

1. There is a continuing requirement to seek major efficiencies despite the growing demand, particularly in relation to older people and those with complex needs. The service was overspent primarily as a result of some very high care packages and work is being undertaken to find more cost effective ways of providing care. The move towards an integrated budget through the establishment of the Integration Joint Board provides an opportunity to make better use of collective resources.

Capacity and Quality of Services

1. Increasing demand on Care at home services continues to be a major challenge to deliver the care and support needed. This is heavily impacting on assisting hospital discharges and supporting people at home in the community who require increased care and support. However, a number of service reviews and development work is underway to attempt to manage the challenges and respond in time to hospital discharges.

2. Staff resource diverted to support a large scale investigation which commenced late last year.
